

Contact us now to discuss your next project!

Pacific Rim Sound is a full-service mobile recording and production company, specializing in live recording of concerts and recitals. In addition, we offer a number of special packages, including:

Audition tapes—college, grad school, etc

Making a great-sounding audition tape has never been so easy. Let us handle the technical details so you can focus on giving your best performance. Includes recording, production, and 2 CD's. \$50

Recital CD production

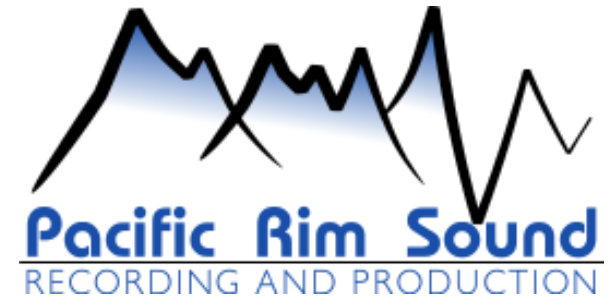

Turn your junior or senior recital into a lasting memory. We take your music department recording and create an edited, polished CD that your family and friends will cherish. Includes production, design of case inserts, and 4 CD's; order additional CD's for cheap. \$50

Special packages are also available for ensembles who wish to record a concert but lack the budget. Please contact us.

recording specialists*

Mobile Recording

Post Production

Graphic Design

CD Duplication

*Local • Affordable
Quick Turnaround*

Since 1999, Pacific Rim Sound has been providing mobile recording services of the highest quality. If you can dream it, we can record it.

Live Recording

Pacific Rim Sound specializes in live event recording of concerts, recitals, and more. Now you can capture your event with the latest in high-resolution digital recording and produce CD's for your ensemble members and fans. Our microphone placement techniques allow us to capture the best possible sound while remaining unobtrusive to your event and your audience.

Studio Recording

We can also perform studio recordings, but with a unique advantage--we can bring the studio to you! Our background in live recording allows us to set up our studio in any location, taking advantage of a unique acoustic, or simply making recording convenient and enjoyable.

Latest digital technology

We will record, edit and produce your project using the latest in high-resolution digital audio technology. Our modern

workstations support digital standards up to 32 bit/96 kHz, high track counts, and are fully upgradeable to support the newest standards, including surround sound mixing and DVD-Audio.

High-end equipment

To obtain the highest possible quality for your important projects, we utilize a variety of equipment from industry-leading audio companies, including:

- Microphones by Neumann, AKG, Audio-Technica, and Crown
- Low-noise mic cables by Canare
- Digital recorders by Alesis and Sony Pro Audio
- Effects processing by Lexicon
- Digital workstation interfaces by Mark of the Unicorn
- *Samplitude* workstation software by Magix (S'ekd Germany)
- Monitoring by Tannoy and Hafler

In-house duplication and production

Once finished, your project can be duplicated in-house on our high-speed CD duplication and printing line. We can economically duplicate up to 250 units, including on-disc printing and full-color booklets and tray cards, to meet your needs quickly and without the hassle of outside duplication firms.

Rates you can afford

We offer both hourly and project-based rates, and can advise you on the best way to utilize your recording budget,

making it possible to create quality projects without spending a fortune.

Experience that counts

In the world of audio, experience can often be the most important factor in ensuring your project's success. We have a proven track record spanning more than five years, and draw on a wealth of past experience.

Past clients include:

- Alaska Chamber Singers
- Alaska Children's Choir
- Anchorage Symphony Orchestra
- Carl Schroeder, composer
- David Melby, singer/songwriter
- Kristen Graves, singer/songwriter
- Muziko Nova
- Sitka Music Festival
- St. Olaf Cantorei
- St. Olaf Summer Music Camp
- Sweet Adelines International
- United Methodist Church of Chugiak
